## Excellence in the Application of Gears, Motors or Drives

Nominating criteria and instructions:

- Nominating is free and must be completed using this online form by 11:59pm Friday 28 February 2021.
- Your nomination must be completed in one sitting; a partially completed form cannot be saved and reopened at a later date.
- All products and/or technologies must be manufactured and/or commercially available in Australia.

- Please have any supporting documentation (i.e. brochures, photographs, testimonials) ready to upload. No single file should exceed 3MB in size. Any file above that size won't be provided with judging files.
- All nominations must be accompanied by a high-resolution image (at least 1MB in size) suitable for print publication.

By submitting a nomination, you give Prime Creative Media permission to publish all or part of your nomination in Australian Bulk Handling Review or another suitable publication.

## **Excellence in the Application of Gear, Motors or Drives**

A component or piece of equipment that provides a benefit to bulk solids handling operations.

**Provide the equipment name (as you would like it listed in marketing and communications).**

**When was the product introduced to market?**

**Demonstrate how the gears, motors and/or drives enhances bulk solids handling processing, focussing on at least one of the following: safety, efficiency, production outputs, cost-saving. (70 points)**

**Nomination must showcase how the product differs from other available solutions. (30 points)**

**Upload your 1MB image:**

**Upload any supporting documentation:**
