## Innovative Technology

Nominating criteria and instructions:

- Nominating is free and must be completed using this online form by 11:59pm Friday 28 February 2021.
- Your nomination must be completed in one sitting; a partially completed form cannot be saved and reopened at a later date.
- All products and/or technologies must be manufactured and/or commercially available in Australia.

- Please have any supporting documentation (i.e. brochures, photographs, testimonials) ready to upload. No single file should exceed 3MB in size. Any file above that size won't be provided with judging files.
- All nominations must be accompanied by a high-resolution image (at least 1MB in size) suitable for print publication.

By submitting a nomination, you give Prime Creative Media permission to publish all or part of your nomination in Australian Bulk Handling Review or another suitable publication.

## **Innovative Technology**

A technology designed to enhance bulk solids handling and processing.

**Provide the technology name (as you would like it listed in marketing and communications)**

**When was the product introduced to market?**

**Demonstrate how the technology has improved bulk solids handling efficiency and cost-saving. (30 points)**

**Demonstrate how the technology differentiates from other market offerings. (20 points)**

**Showcase how the technology improves at least one of the following: environment, production outputs, safety. (50 points)**

**Upload your 1MB image:**

**Upload any supporting documentation:**
